

Quick Start Guide Toro 725QXE

To start the Toro 724QXE , insert the key, prime the engine three times, and set the choke to the "START" position. Then, use either the electric start by plugging in an extension cord and pressing the button, or the recoil start by pulling the cord. Once the engine starts, move the choke to the "RUN" position.

Step-by-step instructions

1. Insert the key: Make sure the ignition key is pressed all the way in.
2. Prime the engine: Push the primer bulb three times.
3. Set the choke: Move the choke lever to the "START" position.
4. Start the engine:
 - Electric start: Plug in an extension cord to the snowblower and the power source, then press and hold the electric start button until the engine starts. Avoid holding the button for more than 5 seconds at a time to prevent overheating.
 - Recoil start: Pull the starter cord to start the engine.
5. Disengage the choke: Once the engine is running, move the choke lever to the "RUN" position.
6. To shut off: Remove the key.
